

# Yang Ming receives 2,000 new reefer boxes

November 20, 2023

Carrier Transicold provided 2,000 PrimeLINE refrigeration units, featuring its Lynx Fleet digital solution, to Yang Ming Marine Transport Corp.

With this new addition to its refrigerated cargo fleet, the Taiwanese shipping company is able to transport and monitor a wider range of perishables, to new and farther locations.

The Lynx Fleet solution includes proprietary technology that monitors reefer unit performance and provides early warning actionable diagnostics and predictive analytics down to the level of the machine's components.

"We are pleased that Yang Ming Marine Transport Corp. has decided to expand its refrigerated cargo fleet with us, as it is a testament to the quality of our service and technology in the cold chain industry," said Leow Eng Meng, sales director, Asia, Global Container Refrigeration, Carrier Transicold.
