

# Delivery of the CMA CGM MERMAID: First ship in a series of 10 container ships with a unique design in the world for better energy performance

- A unique design, the result of collaboration between CMA CGM, Chantiers de l'Atlantique, and Hyundai Heavy Industries, which heralds a new generation of container ship
- A novel design that enhances energy efficiency and environmental performance of the vessels by up to -20% CO2 emissions, in line with the Group's decarbonization strategy.
- The ten new vessels of 2,000 TEUs will progressively be positioned in the Mediterranean and Northern Europe for transporting goods over short distances, facilitating modal shift from road to sea.
