

How does the MSC Biofuel Solution work?

Biofuel is bunkered on demand and is an opportunity for each customer.

When you choose MSC Biofuel Solution – regardless of the cargo’s port of origin or destination – we purchase biofuel to achieve your climate targets for use throughout our global network.

When we bunker biofuel, we obtain the Proof of Sustainability from the biofuel supplier.

We transfer to the customer the Retirement Statement and the Verification Statement issued by an external auditor who verifies the carbon offsetting process.

Episode 4

“From Ambition to Action”

Meet Allen Clifford, MSC Executive Vice President.
