

Decarbonization Gauge : Reduce your shipments' carbon footprint

ENVIRONMENT

ACT+
LOW CARBON SHIPPING

We are delighted to announce the launch of an innovative eCommerce feature the decarbonization gauge.

How does it work?

When you request your quotation on SpotOn, you will simply **choose the level of carbon emissions reduction you aim to achieve** (up to 84%) by using alternative fuels.

Additionally, you can effortlessly offset the remaining emissions with our CARBON OFFSET solution (starting from a net reduction of 20%).

This new digital feature will give you a simplified and seamless access to ACT+, our complete range of low-carbon solutions available for you since 2020 to measure, reduce and offset your carbon emission in your maritime transportation and provide you an official and audited declaration of CO2 reduction.

Let's work together to achieve your sustainability goals.
