## Yang Ming unveils enhanced 2025 Transpacific network

Yang Ming has announced its upgraded Transpacific service network for the next year, which will commence in February 2025. The Taiwanese ocean carrier said it will refine its Transpacific service network in response to the upcoming change within alliance membership. The enhanced network will feature a total of 13 loops covering both Asia – US ... [Continue reading](#)

"Following the long-term partnership with HMM and Yang Ming within THE Alliance scope on the Pacific, and the addition of the already announced ONE independent WIN and AP1 services from April 2024, ONE will deploy 16 core weekly services on the Trans-Pacific trade from February 2025," said Jeremy Nixon, CEO of ONE.

He went on to add, "The emphasis will be on quality end-to-end direct services with high schedule reliability. The core products will include sufficient sea speed buffers and are designed so that the impact of Hapag's departure in 2025 will have a minimal impact on ONE's network and customers over the post-CNY disengagement period."
