### Bridging the Gap between Strategy and Execution in Supply Chain

Supply chain became a household word awakening consumers everywhere thanks to the coverage by the global and industry media about supply chain disruptions like port closures, container shortages, insane freight rate hikes, imbalance in supply and demand, job losses, seafarer conditions and many more that COVID brought about...

by **Hariesh Manaadiar**, Founder at Shipping and Freight Resource and Features Editor – OceanFreight at CargoNOW

## **Red Sea shipping crisis has now resulted in extra 14 million tonnes of CO2 since start of crisis – as much as emissions of 9 million cars**

The crisis in the Red Sea, which has forced many ships to reroute around the Cape of Good Hope, has dramatically increased the carbon footprints of companies reliant on shipping, undermining their ability to hit Net Zero commitments...
