Hurricane Beryl made landfall in Texas on Monday causing widespread flooding, debris and power outages.

Port Houston said that after conducting preliminary assessments of its facilities, power, and systems, all terminals would remain closed on Tuesday 9 July. As work continues to repair damage the port said it would update by 4pm local time

on 9 July whether disruptions to operations would continue on Wednesday 10 July.

The Port of Galveston posted on social media platform X at 7pm on 8 July that port offices were closed due to power outages.

The Port of Corpus Christi, the largest energy port in the US, said that as port personnel assessed damage from the storm no significant impact had been reported. It said port offices were scheduled for normal operations on Tuesday 9 July.
