

MSC UNVEILS FUTURE STANDALONE EAST/WEST NETWORK

Dear Valued Customer,

We are pleased to announce that from February 2025 onwards, **MSC will provide a unique and holistic East/West solution for all customers, offering both Suez and Cape of Good Hope routing options.** This future standalone network will replace the current 2M VSA agreement with Maersk on East/West trades.

As part of our commitment to offering an independent, competitive, and complete network, the new MSC East/West network will include:

Extensive Coverage: 5 trades with 34 loops, incorporating:

- 7 loops for Asia-North Europe
- 6 loops for Asia-Mediterranean
- 4 loops for Asia-North America West Coast
- 6 loops for Asia-North America East Coast
- 11 loops for the Transatlantic Network

Flexible Routing: Optionality of weekly services via Suez with more than 1,900 direct port pairs, or the Cape of Good Hope with more than 1,800 direct port pairs.

Please note that the 2025 East/West network and its options will not impact the tonnage or deployment for any other routes provided by MSC globally.

For full details of the future East/West network, including detailed service maps with routings, transit times and more, please click the link below:
