

## Watermark levels on the river Rhine - Low Water Surcharge

Hello Customers,

We are sending you this newsletter to inform you about the present gauge levels at Emmerich, Ruhrort, Köln and Kaub.

The relevant measurement for calculating the Low Water surcharge is the gauge level measured at 05:00 am on the actual day of departure of the barge. We make every effort to inform you promptly of changes, but would still ask you to keep yourself informed from other sources about current water levels.

The following table gives you an overview of the development of the gauge levels.

With kind regards  
Contargo Waterway Logistics
