

Sustainability: Gemini Cooperation – A key enabler to decarbonize your supply chains

On December 3, 2024 we opened for bookings for all our Gemini Cooperation services and we are looking forward to having your cargo on board.

Decarbonization is a central cornerstone of our Strategy 2030, where we have set ambitious targets: reducing our absolute emissions by over one-third by 2030 and achieving net-zero emissions by 2045. Our targets are aligned with the 1,5-degree Celsius trajectory outlined in the Paris Agreement, demonstrating our commitment to mitigate climate change.

Our Gemini Cooperation is an important enabler to reduce carbon emissions with several key levers to support meeting our ambitious decarbonization goals.

- **Effective Hub & Spoke model:** Our innovative network will ensure industry leading schedule reliability of over 90%, minimizing delays connecting our network efficiently and deploying larger vessels on high demand routes.
- **Strategic terminal hubs:** Key to our hub & spoke model are the hub terminals, carefully selected for high quality and productivity leading to better integrated communication and efficient network operations.
- **Reduced waiting times:** Due to higher reliability, clockwork operations and high productivity terminal operations, we will be able to reduce waiting times directly, impacting on fuel consumption and emissions.
- **Speed Optimization:** Higher reliability and less unproductive times, e.g. waiting times in ports allowing for optimization of service speeds and fewer speed-ups.
- **Alternative fuels:** A growing number of deployed dual-fuel propulsion vessels on Gemini Cooperation trades will ensure a more sustainable fleet.

With larger vessels in our core network, better utilization and optimized speed profiles and port stays, Gemini Cooperation will be an important enabler to reduce carbon emissions driven by a significantly more efficient network.

Ready to book? Here are a couple of useful updates:

- **Trade Brochure:** Find key trade information in the latest East – West Service Network 2025 Trade Highlights [overview](#).
- **Service details:** Browse each service through our [Service Finder](#), to discover our entire East-West Service Network 2025
- **Schedules:** Find your preferred port pairs alongside all relevant information with [Schedule](#).
- Gemini Cooperation latest information can be found [here](#)

Book Reliability. Book Connectivity. Book Sustainability.
